No building shall be erected, placed, or altered on any lot until the construction plans and a plot plan showing the location of the structures have been approved by the Architectural Control Committee as to general compatibility of external design with existing structures, and as to location with respect to topography and finish grade elevation. In considering the harmony of external design between existing structures and the proposed building being erected, placed, or altered, the Architectural Control Committee shall consider only the general appearance of the proposed building as that can be determined from front, rear, and side elevations on submitted plans. Considerations such as size, setback, cost, and other specific objective requirements are separate and apart from the function of the Architectural Control Committee. In the event this Committee, or its designated representative, fails to approve or disapprove within thirty (30) days after plans and specifications have been submitted to it, or in any event, if no suit to enjoin the

construction has been commenced prior to the completion thereof, approval will not be required and the related Covenants shall be deemed to have been fully complied with.
